Leakage-resilient cryptographers in the Latincrypt-model

by JGD and FRH

As you can see, the steering committee was composed by qualified Latin American leakage-resilient cryptographers, who after a careful discussion…

Welcome!

LATINCRYPT 2010, Puebla, México,

Sunday August 8th-Wednesday August 11th, 2010

Cinvestav

Cooperation with:

LatinCrypt Reel

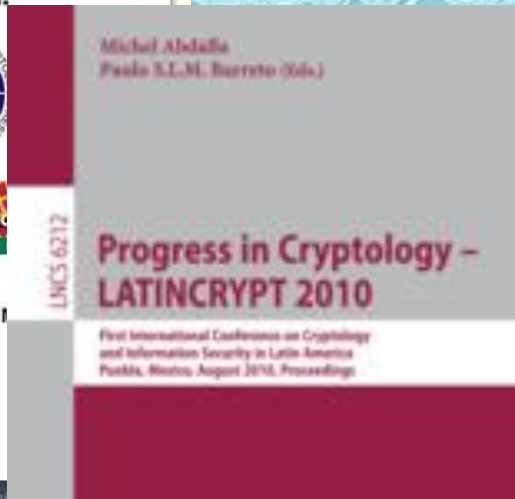
Co-Sponsored by:

Intel Tecnología de M



At first, the conference went smooth, the selected venue was the gorgeous Barroque Hall [circa 1700]

During the conference first meal, the steering committee was steering nothing less than…

The famous *“Chiles en Nogada”*, and…

Ant eggs!! [so-called *Mexican caviar*]

After that, we got some enthusiastic participants…

…also the leakage-resilient cryptographers dared to adventure into a Puebla City tour by means of a double deck bus that didn’t have a roof

Which was a clear leakage opportunity for Tlaloc, our beloved Aztec God Lord of the rains…

Nevertheless, leakage-resilient cryptographers were still showing their unshakable [over]confidence..

but soon after, leakage-resilient cryptographers got into action…

and Tlaloc showed his mighty power …

That was felt by Orr and Francisco who were subjugated by Him…

Partially because of that, leakage-resilient cryptographers decided to make a move to more promising scenarios

They enjoyed themselves showing their skilful salsa abilities…

They decided to leak bits of rhythm and passion…

And friendship…

And to synchronize their leakage capabilities

Testing the limits of the continuous leakage model….

While redefining side-channel attacks …
